

ANNOUNCEMENT:

G&Z NAMES ERCO ITS DEALER IN THE BALTICS

Ripon, California U.S.A. June 11, 2021 – ERCO Technologies joins the G&Z global dealer network undertaking the sale and service of the G&Z concrete slipform pavers in the Baltic states.

ERCO is a representative of global construction equipment manufacturers in Lithuania. The company supports its customers with genuine spare parts and a high-quality service through its trained and professional personnel. “ERCO is a compilation of global construction manufacturers and with joined efforts of our partners we are successfully delivering whole package of solutions to the contractors. We were missing concrete slipform pavers in our portfolio and partnering with G&Z is a great addition to our business line. G&Z is a well-known manufacturer of a high-quality concrete slipform paving equipment and ERCO will gladly be a mediator in transferring G&Z’s knowledge and experience to the Baltics.” says Arturas Stakauskas, ERCO’s Director and CEO.

“Construction in the Baltics had been growing at a quick pace prior to the Covid-19 crisis. We expect the industry of the region to regain at least that growth momentum by 2022, driven by recovery in foreign investments, exports, consumer and business confidence and the government’s investments in the infrastructure construction projects. At this time opening our doors to the Baltic states seems reasonable.” added RK Shaw, G&Z’s VP International Sales & Service.

Both companies are ready to meet the infrastructure challenges of the Baltic states with the best technology and trustworthy relationship.
